

**ATOMIC**  
*Science Distribute Co.,Ltd.*

**Global 240 (240T/H) – BPC Biosed, ROMA - Italy**

# Global 240 (240T/H)

- Automated clinical analyzer, **240 T/H** throughput (photometric)
- weighs **45kg**
- **30 doubles reagents or 60 mono reagents refrigerated**
- **40 samples positions** (cups or tubes)
- sample volume 2-100  $\mu\text{L}$
- level sensor detector for samples and reagents
- Pre/post dilution of sample
- 50 long lasting optical cuvettes with 0.6 cm of optical path
- Minimum reaction volume 220  $\mu\text{L}$
- Low water consumption, **3 liters for 300 tests**
- Photometer with 9 interference filters in the range 340 nm-700 nm
  
- Compatible for both **original (Italian) and local (Class-1) reagents**
- Provided with **Method Validation** deferring machine-reagent by the company's product specialist team
